OBJECTIVE

AWS Certified Solutions Architect - Associate and Software Developer with comprehensive, hands-on experience in the end-to-end application lifecycle. Proven ability to design scalable, secure cloud infrastructures on AWS, develop full-stack web applications, and implement robust DevOps practices including CI/CD pipelines, containerization with Docker, and infrastructure automation. Seeking a challenging role to leverage this integrated skill set to build, deploy, and optimize efficient and reliable software systems.

EDUCATION

B.Tech in Computer Science and Engineering, VIT-AP University Expected 2027
(CGPA: 8.11)

Relevant Coursework: Introduction To Programming (C/C++), Problem Solving Using Python, Object Oriented Programming (Java), Data Structures and Algorithms (Java), Foundation of Blockchain, Blockchain Architecture Design, Soft Computing, AWS Solutions Architect.

SKILLS

Technical Skills

Programming Languages: JavaScript, Python, Java
Databases: MySQL, PostgreSQL, MongoDB
Frameworks & Libraries: React.js, Express.js, Node.js
Cloud & DevOps: AWS, Jenkins, Docker, GitHub Actions (CI/CD)
Concepts: Object Oriented Programming, Networking, REST API

Soft Skills

Problem Solving, Teamwork, Time Management, Adaptability, Communication

PROJECTS

Jaya Stores – E-Commerce Platform | React, Node.js, Express, PostgreSQL, AWS Sep 2025 – Present

- Developed a production-ready full-stack e-commerce platform for a village retail store with responsive UI and admin dashboard.
- Implemented JWT-based authentication, role-based access, and password reset via OTP.
- Integrated Razorpay for UPI/COD payments with server-side verification and PostgreSQL-based order management.
- Deployed frontend on Vercel and backend on AWS Lambda with S3 storage, automated through GitHub Actions CI/CD.
- Technologies: React.js, Node.js, Express.js, PostgreSQL, AWS (Lambda, S3), Google Gemini AI, CI/CD.

VivasayiAI – GenAI Farming Assistant | React, Node.js, LangChain, MongoDB, AWS Oct 2025 – Present

- Built a domain-adapted GenAI chatbot delivering farming-specific guidance for Tamil Nadu farmers using Retrieval-Augmented Generation (RAG) to minimize hallucinations.
- Implemented bilingual (English/Tamil) interface with voice input (speech-to-text) for accessibility and inclusivity.
- Integrated real-time weather data for Tamil Nadu districts and a farming knowledge base for contextual recommendations.
- Secured authentication with Amazon Cognito and deployed containerized services using Docker and AWS ECR.
- Automated CI/CD pipeline through GitHub Actions for continuous deployment and updates.
