EXECUTIVE SUMMARY

Computer Science undergraduate with experience developing scalable full-stack applications and backend systems using Java, Node.js, React, MongoDB, and AWS. Built production-ready applications with REST APIs, cloud deployment, CI/CD pipelines, and modern software engineering practices. Strong foundation in data structures, algorithms, object-oriented programming, and system design, seeking a Software Development Internship to build reliable and scalable software products.

EXPERIENCE

- Buymyplot LLP** | *Software Engineer* | Next.js, Node.js, Express.js, MongoDB, AWS Jun 2026 - Present
- Develop and maintain production-grade features for a real estate platform, contributing across frontend, backend, database, and AWS cloud infrastructure.
 - Designed and implemented RESTful APIs, backend business logic, authentication workflows, and core platform functionalities using Node.js and Express.js.
 - Implemented a property sharing system with share tracking, enabling administrators to monitor property sharing activities through the admin dashboard.
 - Designed and implemented a unique support ticket identification system to streamline support request management and administrative workflows.
 - Implemented secure role-based administrative features, including OTP-based admin deletion verification, Super Admin protection, and validation to ensure at least one Super Admin account always exists.
 - Collaborated on application architecture, database design, AWS deployment workflows, feature planning, task allocation, and production releases to improve platform scalability and maintainability.
- Buymyplot LLP** | *Software Engineer Intern* | Next.js, Node.js, Express.js, MongoDB, AWS Feb 2026 - May 2026
- Contributed to the development of production features by implementing frontend components, backend APIs, and resolving application issues.
 - Assisted in designing functional workflows, application architecture, database schemas, and AWS cloud infrastructure.
 - Collaborated on developing RESTful APIs, integrating backend services, and optimizing existing platform modules.
 - Assisted in implementing key platform features, including bulk property upload workflows, authentication modules, and administrative functionalities.

EDUCATION

B.Tech in Computer Science and Engineering, VIT-AP University Expected May 2027
CGPA: **8.07/10.0**
Relevant Coursework: Data Structures and Algorithms, Object-Oriented Programming, Software Design and Architecture, Database Management Systems, Computer Networks, Operating Systems, Software Engineering, Soft Computing.

SKILLS

Programming Languages: Java, JavaScript
Frontend: React.js, HTML5, CSS3
Backend: Node.js, Express.js
Databases: PostgreSQL, MongoDB, MySQL
Cloud: Amazon Web Services (AWS) – EC2, Lambda, API Gateway, S3, Cognito, ECR, IAM, CloudWatch
DevOps & Tools: Docker, Git, GitHub Actions, Jenkins, Postman
Core Concepts: Data Structures and Algorithms, Object-Oriented Programming, Software Design and Architecture, REST APIs, Authentication (JWT), Computer Networks, CI/CD

PROJECTS

Jaya Stores – Full-Stack E-Commerce Platform (Live)

React.js, Node.js, Express.js, PostgreSQL, AWS

Sep 2025 - Present

- Designed and developed a full-stack e-commerce platform featuring a responsive customer interface and an admin dashboard for product, inventory, and order management.
- Built RESTful APIs using Node.js and Express.js for authentication, product management, shopping cart, order processing, and user administration.
- Implemented JWT-based authentication, role-based access control (RBAC), and OTP-based password reset to enhance application security.
- Designed and optimized a PostgreSQL database schema for efficient product catalog, order, and customer management.
- Deployed the frontend on Vercel and the backend on AWS Lambda with Amazon S3 for media storage, automating deployments using GitHub Actions CI/CD.

VivasayiAI – AI-Powered Farming Assistant (Live)

React.js, Node.js, LangChain, MongoDB, AWS

Oct 2025 - Present

- Developed a full-stack AI-powered farming assistant providing contextual agricultural recommendations using Retrieval-Augmented Generation (RAG).
- Built RESTful backend services for chatbot interactions, secure authentication, knowledge retrieval, and real-time weather integration.
- Implemented a bilingual (English/Tamil) interface with speech-to-text support to improve accessibility for farmers.
- Designed a MongoDB-backed knowledge base integrated with LangChain for efficient document retrieval and response generation.
- Integrated Amazon Cognito for authentication and deployed containerized services using Docker, Amazon ECR, and GitHub Actions CI/CD.

CERTIFICATIONS

- **AWS Certified Solutions Architect – Associate** (Credly)
- **IBM DevOps Fundamentals** (Certificate)
- **IBM Agile and Design Thinking** (Certificate)
